5:00 AM	5:00 AM	5:00 AM	5:00 AM	5:00 AM	5:00 AM	5:00 AM

This schedule meets the State Water Board regulatory requirements issued July 15, 2014

Conservation Measures to follow:

- Use a broom to clean the driveway and sidewalk
- Ornamental fountains and evaporative coolers should have recirculation pumps
- Use an on/off nozzle on hose when washing all vehicles
- No flooding the gutters.
- Newly planted lawns may be watered daily until the second mowing only

Water Conservation Tips:

- Check all faucets and fix all Leaks
- Install low flow flush device in toilets
- Install low flow faucet and shower fixtures
- Take shorter showers
- Store water in the refrigerator instead of letting the tap run to get cool water
- Avoid letting the water run continuously while rinsing dishes
- Never put water down the drain when it can be used for another purpose: watering plants or cleaning
- Check automatic sprinkling systems for broken sprayers
- Use shorter watering times for lawns
- Water lawns in the morning or at night for less evaporation
- Avoid watering lawns on windy days
 - To eliminate runoff and water waste, use the cycle and soak method of watering. For spray head sprinklers, water in two cycles, 3-6 minutes per cycle. For rotor heads, water in two cycles, 10-12 minutes each cycle. Space each watering cycle about an hour apart to allow the water to soak in
 - Be willing to accept a less than lush lawn during the drought.
